## The Wright Stuff

### A Word from Bob Wright

Whenever I see a professional's name listed (associated with the medical industry), whether it is on a door, in a program as a speaker, as a participant in a clinical study or research project, etc., I often wonder what those many letters and abbreviations behind his or her name actually represent.

Of course, most of us know by now that “M.D.” is medical doctor, “N.D.” is naturopathic doctor, “D.C.” is a chiropractor, and “D.D.S.” is a dentist. People put a lot of stock in these initials and, to be fair, many of these doctors, dentists, and other medical workers have journeyed far and worked very hard to be able to use these acronyms. And, subsequently, they are awarded with the prestige that these titles represent.

Sometimes, however, these are taken a bit far and the reverence poured out upon this presumed deity is over the top. Again, I am not bashing good doctors and those in the medical and health and wellness fields that are trying their best to help those of us who really need it. May God Bless them. No, as far as I am concerned – use whatever initials you like that represent who you really are or, I guess, what medical science says you are. Go for it.

But what really puzzles me is when someone has spent a great deal of their life researching and studying (although, maybe not at an accredited institution) and has – beyond any doubt – become a true expert in their area of knowledge and understanding – and the purveyance of this expertise. Bill Henderson, Ty Bollinger, Webster Kehr, Mary Tocco, et al., huge names in the anti-cancer and anti-vaccination movement – have no initials behind their names, yet have probably done way more good over the past ten to twenty years than a whole boat-load of doctors and researchers. Sadly, they get no kudos, few thank yous and, often, are ostracized, persecuted, and prosecuted for their gall of telling people the truth and practicing what they preach. The nerve of these people – and may God Bless them, as well.

I get that a lot. Who are you Mr. Wright? You aren't a doctor. There are no letters behind your name. What right do you have to tell or advise people what they should do for their cancers? What do you know that doctors don't – especially since they spent hundreds of thousands of

dollars and more than a decade to become the professionals that they are? Good questions – all. Most of you who have followed me, the AACI/IWARC, or any of these previously mentioned individuals, know the answers to those questions. The fact is that we are not confined to allopathic medicine and its “conventional” wisdom (wisdom???) to which only their diagnostic, surgical, and pharmaceutical knowledge and understanding are relevant or allowed.

You see, we really do know when these things are necessary and warranted. And, it’s not 100% of the time. Truth be known – it’s probably more like 10% of the time. This is not acknowledged within Western medicine because a lot of power and money disappear when people move to natural intervention (the healing mechanisms that God invented).

So, I have gone about the huge task (not really!) of rectifying this huge injustice. No longer will those of us who are truly steeped in the language of the natural healing arts be hounded for having no initials, no acronyms, no string of letters behind our names. No way, Jose. I’m taking a stand, and I hope that all the others who are questioned and belittled for lack of degrees – and not lauded for their wisdom and understanding of what really works for sickness, disease, and wellness – will join me in this endeavor. At a minimum, it will cause a significant amount of “pause” to those who will want to be critical – but can’t be because they have no clue about what those letters mean!

So, here is how I am going forward. Others, obviously, are free to choose their own. Although I hold a BS (no, it means Bachelor of Science) degree – I’m leaving that out. No one pays attention to that anyway. This is what it will look like from here on out:

Robert G. Wright, NDCS, GOH, POT

Wow, that will get everyone thinking! What on earth do those mean? Is NDCS a naturopathic doctor of cancer studies? No. Is a GOH a good ‘ol human? No. And, what about that POT? Pretty obvious teacher? No.

NDCS = Non-Doctor of Common Sense

GOH = Giver of Hope

POT = Purveyor of Truth

Well, I like them. You may not. And, no one will really know unless they ask. That’ll keep ‘em guessing.

No, this is not an attempt to pass myself off as some kind of doctor. Most people I meet are delighted that I am not a doctor and understand that my methodologies are not limited and I can tell them what I believe to be the truth – no matter what.

Is this designed to have a little fun? You bet it is. And, this writing is now documented evidence that there is no harm intended and – if these “initials” prove to interfere with or duplicate some revered title that already exists, people will know that it was a purely unintended consequence. Just maybe, someone will come to hear the truth that they might not have heard because I lacked the credentials and they didn’t think it worth their while. Maybe a doctor or other health care worker will think that what I might have to say may be significant – since I now have all these letters behind my name. Perhaps they will get a heavy dose of “the other side” and start thinking about patient options.

Whatever the case, my only goal here is to further the message. If I am forced to “take these down” at some future date – so be it. My hope is that many will catch the wave of fun and ridiculousness that this represents and maybe, just maybe, someone, somewhere will be helped because of this. We shall see and time will tell.

Until then, I introduce you to my new self:

Robert G. Wright, NDCS, GOH, POT

Nice to meet you.

Bob Wright, NDCS, GOH, POT

# Neurodegenerative Diseases

It is apparent that more and more of our friends and family are being diagnosed with neurodegenerative diseases. Yes, Parkinson's, ALS (amyotrophic lateral sclerosis – Lou Gehrig's disease), Alzheimer's, Huntington's, and many others fall into this “catch-all” category for conditions that affect the neurons in the human brain.

The slow deterioration of motor skills and cognitive function is both difficult and heartbreaking to watch. It seems as though a once vibrant, intelligent, and active human being is disappearing before our very eyes.

Sadly, modern medicine has no solution nor do they know the causative factors that produce this neurological destruction. We have said many times that it is very difficult to produce a solution if you do not know what caused the problem. The foregoing is the bad news. Now, here's the good news.

It should be beyond question at this point in time that heavy metal poisoning (especially aluminum) and the constant attack on our bodies by chemicals (ingestion and inhalation – even transdermal) play a key role in most sickness. From aspartame (NutraSweet) – which is an excitoneurotoxin – to flu shots, other vaccinations and drugs, and the heavy metal and pesticide/herbicide poisoning of our food chain, it's simply no wonder that these neurodegenerative sicknesses are exploding.

However, in the knowledge and understanding of the causes, the Phoenix rises. The brain needs cholesterol to survive. Yet, to doctors, this necessary ingredient has become the enemy. We are told and instructed by our physicians and our televisions (the pharmaceutical cartels) that our HDL and LDL numbers must be lower and lower so that our risk of heart disease can be minimized. What a crock that is. If you are my age and

your overall cholesterol is not at least 200 – you’re probably in trouble. The brain is 70-80% water. And, yet, most of us are dehydrated because we don’t drink enough of the right kinds of fluids, especially water (think ionized water). Finally, because the aging brain fails to produce enough insulin and the glucose (food for the brain) conversion deteriorates and does not supply the needed energy for proper function, the brain begins to die.

So, what’s the solution? Well, let’s reverse the flow. If the brain needs cholesterol, let’s give it cholesterol and make sure it’s getting enough (I just ticked-off a city-sized population of doctors with that one). If the brain needs more water, let’s provide this elixir in its most efficacious form. And, if the energy system that is feeding the brain becomes ineffective or inactive, let’s fire it up again. And, yes, we can now do all of these.

First, the cholesterol thing is a no-brainer (sorry). Folks, get off the statin drugs. They are poison and will kill you (now I’ve ticked-off Big Pharma). Get on the right diet, largely organic and much of it raw, and this cholesterol thing goes away. Drink ionized water, specifically, Kangen Water – the best there is (now I’ve ticked off the soft drink industry – ah, the trifecta is complete). Your body will be hydrated (this water hydrates four times better and faster than any other type of water), it will be flooded with anti-oxidants, and will reduce the acid terrain within you (the cause of all disease) and start making it alkaline. It’s a win-win-win. In addition, by adding 4 or more tablespoons of extra virgin coconut oil, you will have supplied the medium chain triglycerides that your liver will turn into ketones that becomes the new fuel for the brain and begins to normalize it. Let’s complete this regimen by supplementing with one of the greatest anti-disease foods of all, turmeric, which has shown to be brain healing and an aggressive foe of cancer. Finally, Co Q10, Vitamin E, Vitamin B12, and Vitamin D3 (in the form of Blue Ice

Fermented Cod Liver Oil) are very beneficial and indicated for brain function and nourishment. I prefer to get these (minus the cod liver oil) in the Reliv products.

I know, I know. It can't be that easy. Well, yes it is. And, we are beginning to see this play out in case after case. Are there guarantees? Heck no. Compared to conventional medicine's symptom treatment regimen of drugs, drugs, and more drugs, I would choose the plan just mentioned that has now worked and is working for many victims of neurodegenerative disease. Will they be cured? No one can say that. Will they be better? No one can deny that.

There are lots of studies and trials going on right now – and a hard drive full that have already been done – showing, without prejudice or partiality that the “natural” way is, indeed, the best and most promising. We will give you some links at the end of this article.

If it was me or my family, diagnosed or living with Alzheimer's, ALS, Parkinson's, or any other of these life-stealing diseases, I would do this – without question. The choice is yours. At a minimum, please investigate this. Many, many more years of a “high quality of life” may be at stake.

## Reliv Testimonials

### *Tami & Gray Martineau: A Child with Autism*

At the two following links, you will hear about something that you just don't hear about in the conventional autism community. Please do not infer from this astounding turn-around that we (or those involved) are saying that the Reliv products cure autism. None of us are saying that.

However, it is very stunning to see that a five year old child that could not speak suddenly began to verbalize within five days of the introduction of these products. I must say that I am not surprised. You have heard me say over and over again that good nutrition trumps sickness and disease. Even though I have just used the words “stunning” and “astounding” – in essence, I utilize these because Western Medicine rarely sees anything like this – not because I am either stunned or astounded with this outcome. They will probably pass it off as “spontaneous remission.”

All I will say at this point is – expect to see more of these results. Whether you believe that vaccinations, heavy metals, and bad food are directly responsible for the explosion of this malady (we definitely do and can prove it), you must agree that this is a great story. Enjoy.

Gary Martineau in his own words:

## *Michael G. Brahan, Personal Prostate Cancer Experience*

Mr. Wright,

It was a pleasure meeting you at the recent Reliv International Conference in Overland Park, Kansas, and thank you for signing my copy of your most recent book edition. Per your request, I am forwarding information about my experience with prostate cancer and Reliv products. With the help of these products since the beginning of 2012, I have been able to avoid surgery, radiation, and chemotherapy since my initial diagnosis in 2011.

### *Prostate Cancer Statistics and Outcomes*

Michael Brahan, current age: 70

#### Before Starting Reliv:

- 1/5/11: Annual physical exam. PSA 7.6 Referred to urologist.
- 4/13/11 Biopsy: 12 samples taken, two positive for cancer. Diagnosis: Single focus of prostatic adenocarcinoma, Gleason score 3+3=6, involving less than 5% of the cross-sectional area. Pathology report is provided in a separate file. After considering all treatment options, and with concurrence of my urologist, I began a program of active surveillance, instead of the more radical treatments of surgery or radiation. Doctor advised more aggressive treatment would be in order if my PSA rose to 10 or higher, or irregularities are detected during digital exam.
- 7/26/11: Periodic check-up. PSA 4.2.
- 11/8/11: Periodic check-up. PSA 7.4.

## After Starting Reliv (January 2012):

- 2/2/12: Periodic check-up. PSA 5.5
- 5/2/12: Periodic check-up. PSA 3.7
- 6/27/12: Biopsy: 14 samples taken, all negative for cancer. Diagnosis: Benign prostatic tissue. Pathology report is provided in a separate file.
- 11/30/12: Periodic check-up. PSA 3.6
- 6/10/13: Periodic check-up. PSA 6.1
- 10/24/13: Periodic check-up. PSA 5.3
- 3/4/2014: Periodic check-up. PSA 3.38
- 7/10/2014: Periodic check-up. PSA: 5.27

No change noted on digital exams performed by the doctor at each check-up.

Based on PSA readings and no change in digital exams and general physical condition, doctor has not recommended another biopsy.

## Reliv Product Daily Regimen:

- ReversAge: 1 scoop, 3 times daily in separate individual shakes, at least 30 minutes before any other Reliv products.
- 1 shake twice daily, each consisting of:
  - Now: 1 scoop
  - SoySentials: 1½ scoops
  - ProVantage: 1 Reliv Classic size (14cc) scoop
- LunaRich X: 6 capsules daily (2 in morning, 4 at bedtime)

# The Truth about Calcium

I have been meaning to write about this subject for some time. I am delighted that Dr. Bruce West beat me to the punch on this and, truth is, he knows much more about this subject than I do.

To that end, I now forward excerpts from his August newsletter regarding real calcium supplements and what they mean to your health. Take note that almost all Americans are deficient in calcium – at least the kind that actually is usable by the body. As a matter of fact, most of us get far less of the minerals that we need to stay healthy. Our sickness and disease attest to this vociferously. Now, Dr. West:

*“The best, simplest, and fastest way to help all the children in this country is to make sure they have plenty of the right kind of calcium in their diet. And, the same can be said about adults. You see, your body (and your kids’ and grandkids’ bodies) need plenty of usable calcium. [For that reason] all adults, and surely anyone with an infant, baby, or young child should always have a supply of Calcium Lactate on hand. It is the best natural anti-colds and flu, anti-growing pains and rickets, anti-muscle cramps, anti-fever, anti-hyperactivity, and immune enhancing form of nutrition.*

*“Calcium supplements have been all over the news over the past year. Some ‘experts’ are quoted as saying that taking calcium supplements is bad and will cause calcium buildup in your arteries. Amazingly, if you take the wrong kind of calcium, this can be true. You see, your body needs usable calcium in the form of calcium bicarbonate. Almost all calcium supplements are calcium carbonate or crushed rock. In order for your body to make calcium bicarbonate from crushed rock, twelve biochemical steps are needed.*

*“So lots of the calcium from supplements does not get used by your body. Some of the unusable calcium that does not get excreted in your urine ends up similar to the white scale on the inside of a teapot. With too much of this kind of calcium from supplements, you can see how plaque buildup in your arteries or hardening of the arteries could worsen. In addition, too much of the wrong calcium from supplements can end up in kidney stones, or in cataracts, or in arthritic joints as in bursitis and arthritis.*

*“Usable calcium is needed to build strong joints, bones, and teeth. Without adequate usable calcium, you will suffer from osteoporosis and your kids will suffer from ‘growing pains.’ These two conditions are clear signals that you or your kids are suffering from a calcium imbalance. By the way, no matter what you are told by your doctor, growing pains are not natural. They are actually a subclinical (just below the surface) form of rickets – not bad enough to bend bone and cripple like the old days, but serious enough to cause severe pain. If this is the case for anyone in your family, there is no way for them to get by without Calcium Lactate for their bones and joints.*

*“Even the latest medical studies show that a combination of calcium and vitamin D is very helpful to women. When women were tested for seven years taking 1,000 mgs of calcium carbonate (the wrong kind of calcium) and 400 IU’s of vitamin D3 (an isolated, synthetic, inferior form), the benefits were significant. Women enjoyed a third less hip fractures, less fractures of their vertebrae, and increased bone density overall.*

*“In addition, there was a decrease in some breast cancers, a decrease in all cancers, and a decrease in mortality overall. Based on this even the Institute of Medicine is recommending that all women over age 50 supplement with calcium and vitamin D3. I could not agree more. But you can supercharge this protocol by using the most absorbable calcium – Calcium Lactate. And use the entire vitamin D spectrum as*

*found in Blue Ice Fermented Cod Liver Oil instead of synthetic vitamin D3.*

*“There have been all kinds of fad calcium supplements. But most are crushed rock because these are so cheap to produce. It is also why doctors recommend 1,500-1,800 mgs as a daily dose – because so little of it really gets where you need it. Calcium Lactate is made from vegetables and no dairy products. With Calcium Lactate, and especially with ancillary Cataplex F and/or cod liver oil, the calcium does get where you need it. Calcium Lactate is made into calcium bicarbonate (the usable form) in one step in your body (not twelve steps like calcium carbonate made from crushed rock). And that is why the dose is so much lower at around 42 mgs per tablet. You need less of the real thing because it is utilized so many times better and is not just flushed out in your urine.”*

Thank you, Dr. West. Please consider subscribing to Dr. West’s newsletter, Health Alert – When All Other Treatments Fail. It is available for only about \$39 per year and arrives, in written form, monthly. I have been getting this for years and it has opened my eyes to many things in the health and wellness field and made me more knowledgeable concerning what works and what doesn’t when seeking healing modalities – and, staying healthy in the first place. Sign up at [www.healthalert.com](http://www.healthalert.com). You’ll be glad you did.

For the products mentioned in the Dr. West’s article, call and order over the phone at his Health Alert Store at 800-231-8063. Calcium Lactate and Cataplex F are manufactured by Standard Process while Blue Ice Fermented Cod Liver Oil comes from Green Pasture. These products are second to none and some of the best in the world. The Blue Ice is probably the last, best cod liver oil available as most companies are taking out the vitamins A and D and supplementing with synthetics. Think about it.

## **Back to School:**

### ***It Doesn't Have to Mean Back to Colds and Flu***

It's that time again; back to school, and back to dealing with colds and flu. While illness from germs and viruses may seem impossible to avoid, there is a way to protect your immune system, and avoid the flu **WITHOUT** a flu shot. Truth be told; it's actually quite simple!

Since vitamin D is naturally derived from the sun, during the fall and winter months it is important to supplement with a quality vitamin D each day. By eating immune-boosting, organic spices; such as curry, which is rich in turmeric; ginger, garlic, cilantro, and rosemary; you can greatly help your immune system to do its job when the assaults ensue. Another immune booster is to get rid of all sources of animal protein, which suppress the immune system and exacerbate mucus production.

Supplement with zinc and selenium, especially if you have been exposed to a cold or flu. Keep your hands clean, with warm soap and water...**NOT ANTIBACTERIAL** soaps, wipes, or gels; these products often contain dangerous chemicals that get right into the blood, directly through the skin. Get some exercise each day, and get some sleep!

The goal is to equip you with the tools needed to help avoid a cold or the flu by simply boosting the immune system! Colds and flu can easily take down an entire family for **DAYS**, and sometimes **WEEKS**! We would like to help you avoid missed days from work and school, by teaching you a few, simple tricks!

So, protect yourself and your family! Get your daily vitamin D, either from the sun which is best, or from a quality supplement. Eat immune supporting spices such as curry, ginger, garlic, cilantro, and rosemary.

QUIT MILK, and milk products altogether. No one likes MUCUS! Wash your hands, get some exercise, even if it's cleaning your house, or walking the dog, and GET SOME SLEEP; 8 to 10 hours every 24 hour period. Sleeping 16 hours on Saturday does NOT make up for lost sleep during the week! Take care of your body, and your body will take care of you!

~ Jenevieve Fisher  
Executive Director  
[Educate A Cure](#)

**Get Educated! Get healthy, and stay healthy!**

## COMING NEXT MONTH!

Folks, I can't wait to tell you about this. As we are constantly on the lookout for real "game-changers" in the fight against cancer and all sickness and disease, we recently came upon something that, we believe, will change the face of health and wellness for decades to come. Don't miss this. Coming October 1st in *The Wright Stuff*.

## How The ACS Spins the Data

Cancer Statistics (I mean REAL cancer statistics):

The American Cancer Society (ACS) wants you to believe that they are the new “sponsor” of birthdays. They have literally said so with their new television advertising campaign. They also try to convince you that, perhaps, 60-70% of cancer patients are now being healed because of the huge advances in modern medicine.

Once again, I quote one of my personal heroes, Colonel Sherman T. Potter of the television series, M.A.S.H., when I shout unequivocally, Horse Hockey!

In the December 2004 issue of The Journal of Oncology, it was reported by a team of epidemiologists that the 5-year survival rate of cancer sufferers who undergo chemotherapy was a miserable 2.1% in the United States. And, these are people who did their homework.

My friend Chris Wark, in his latest blog update, tells more of the real story about how the ACS spins the data to make the cancer industry and its fabricated results look good. Please read his blog [here](#) and get a dose of reality regarding cancer stats and how easily the truth gets sidetracked.

While you're at it, subscribe to Chris's newsletter blog – it's free and full of testimonials and data you won't find elsewhere. You can find it at [www.chrisbeatcancer.com](http://www.chrisbeatcancer.com).

# Blue Scorpion Project: Escozine™

“Real HOPE for Your Health Challenges,  
HOPE for Your Difficult Decision Processes”

For a person to appropriately and effectively enhance one’s level of wellness it requires a plan to spend time researching and self-educating oneself in the specific area(s) of the present individual health deficiencies. In many cases that involve heart rendering choices, individuals are herded to make decisions that apply pressure for immediate response and participation, but so many of these “quick to decide” type of decisions are brought about via the persons amplified condition causing unwarranted fear, high levels of anxiety and a myriad of other mental, physical and spiritual stressors that further tax and burden ones already depleted immune system.

Native American Nutri-Science and its mission statement is committed in introducing a product(s) that will only be offered as a proven, well documented and safe for use and our first such natural product is called, Escozine™. Escozine™ is one of very few nutraceuticals awarded a patent of use. This patented innovation is presently helping bridge the benefits of nature to those seeking alternative health protocols for one’s health considerations. Escozine™, is a new, revolutionary Natural based nutrient delivered by a patented “polarization” technology, which

increases the efficacy and synergy of its active substance. The isolated and polarized substance is the vital compound which is extracted from the *Rhopalurus Princeps*, or better known as the Caribbean Blue Scorpion.

One key point a person should consider in his or her research and self-education is the importance of product qualification as it relates to their own immune system challenges to the present or historical health concerns and abnormal aggressions. Escozine™ is one of the very few Natural products that have amassed a virtual library of accumulated data of use and related positive results. To be able to better fight against chronic, acute and life threatening disease the body needs to have a strong immune system.

*Escozine's™ Mechanism of Action:* Is a new dietary oral supplement that is a powerful, innovative, and revolutionary product effectively acting against the most pernicious effects of aging and abnormal cellular expressions due to its patented manufacturing technology.

- Escozine™ has shown to help reduce chronic and acute pain and inflammation.
- Escozine™ gives NO interference to what you may already be doing to support your health.
- Escozine™ helps eliminate abnormal cell growth, oncological expressions and division by inducing apoptosis (cell death) in a variety of cancer cell lines compared to many chemotherapy drugs.

*Escozine™: Scientific Innovation*

- Escozine™ has proven effective because it demonstrates a stronger resistant synergy to abnormal cells and malignancies.
- Escozine™ supports the body's anti-aging mechanisms that move against unnatural cell expression.

Native American Nutri-Science stands firm in our support of the holistic and alternative, Natural approach to those seeking relief and positive response to new alternative introductions to help people with compromised immune systems fighting major health battles.

Escozine's™ Mechanism of Action of a polarized, potentiated bio-active peptide formula which contains amino-acids, proteins and minerals that are prepared by the use of the most modern manufacturing technologies to help increase the body's natural ability to strengthen its own damaged or compromised immune system, but also acts as a sound preventative adjunct.

Escozine™ being a novel, potentiated peptide supports the body's mechanisms that move against unnatural cell expression, it affects the mediated transfer of neurological information in such a way as to slow abnormal cell growth, and it triggers the body's natural ability to attack cellular abnormalities through the process of cellular suicide, called apoptosis!

The ravages of ill health and disease are magnified in ways that need to be better examined in order that people can better understand how to select product from product. In the format of today's western medicine marketing, people find themselves inundated with too much content of scientific data that usually is only a precursor to dangerous side effects of product use. It is the purpose of Native American Nutri-Science to introduce a product that has been used for years, countless thousands of people suffering from various illnesses and diseases have seen and experienced their health significantly improve through the use and application of Blue Scorpion Serum-Escozine™.

The human body is a strong and resilient vessel that can and will regenerate given the right format for recovery and the healthy protocols and implementation to allow specific utilization.

I believe there is much too much strategic confusion about what medicine is and what it is not. The consumer needs to be more AWARE of labels, abstracts, white papers, and other professional references to better make a qualified interpretation and product selection of choice and what to expect as to how the product will perform and ultimately be utilized in the body. This is where Escozine™ is unique! Escozine™ has a long history of professional and anecdotal testing and has a long list of professional affiliates that can attest to its performance, efficacy and safety of use. It is a “Natural” product synergized to help strengthen ones damaged immune system as it relates to abnormal cellular activity and proliferation that I believe offers a real exception to many other “alternative or complimentary” products that haven’t produced such a volume of supportive materials of use.

## SOUL Testimony: From the Horse's Mouth

Most folks don't care about their own health but they'll do anything to comfort their four-legged friends. Horses are remarkable animals. SOUL saved my 13-year-old Labrador retriever from death and other canines have also benefited (Dr. Weeks' comment: topical use is safer with dogs than oral use since the D- xylitol in SOUL raises a dog's insulin which lowers their blood sugar. This can be life-threatening). Now we have another great and remarkable testimony regarding a 31-year-old mare.

Posted 7-29-14:

*Well just when I thought I'd heard every type of SOUL testimony... This morning I was out feeding the horses when I realized my 31 year old mare wasn't coming to breakfast. When I walked out to get her I realized she'd somehow hurt her left front leg & was in pain. She's been my girl since she was just 5 years old, so I know what she's feeling & thinking. I applied a liniment and led her to the barn to eat... She was limping horribly. She grabbed a few bites of hay, but wasn't interested in her usual grain breakfast. I waited an hour to see if she would get some relief with the liniment for joints & muscles, but there was zero change. I then tried an aspirin liniment spray... No change. Then my dad suggested to try SOUL. Why I hadn't thought of it, I don't know, but I ripped open a packet and slathered the entire contents on her leg (and some on her other front leg for good measure!); literally within 5-10 minutes she was walking around the yard grazing on grass, with barely a limp!!! I continued to monitor her and let her walk and graze for at least an hour... by that time she was no longer limping, so I led her back to her stall where she proceeded to chow down her breakfast. I am so grateful that SOUL helped my beloved mare today!*

Director of North American Sales  
RAIN INTERNATIONAL*

# SPONSOR HIGHLIGHT

## A financial service for using life insurance today™

For millions of people who are living with a serious illness such as cancer, heart disease, Alzheimer's or AIDS, the high cost of medical care can quickly deplete essential resources. The same is true for many people over the age of 75 who have complicating health factors. Just putting money aside for basic expenses such as groceries and mortgage payments can be a challenge. LIBI gives people a place to turn for additional resources. Through a financial service called a viatical settlement, we enable people to sell their current life insurance policies for a percentage of the total face value. The money people receive may be used for any purpose and, in most cases, is free of federal income tax obligations.

*LIBI can help open the door to new possibilities—such as fewer financial worries, new options for medical care and additional resources to share with family and friends.*

All of us have our own sense of what's important, whether it's reaching a long-held goal, spending time with family and friends or enjoying the simple pleasures of each day.

## What sets Life Insurance Buyers, Inc. apart

People place their trust and confidence in LIBI for many reasons—the financial strength and stability of our company, the experience and commitment of our people, the range and quality of our services, and the leadership and integrity of our organization. These are the qualities that set LIBI apart as the industry's top broker. LIBI has helped convert millions in policies into accessible funds for hundreds of individuals in need. In every relationship, we take the time to learn what's most important to our clients and to provide them with the resources they need, in a timely and confidential manner.

**LIBI**  
LIFE INSURANCE BUYERS, INC.

*Since 1995*

*Working with  
cancer patients and  
their families for  
over 15 years.*

## People who put clients' needs first

We truly understand that people place their trust in us every day—to treat them fairly, to deliver what we promise and to be there when they need us. Our mission is to live up to those expectations every time, without exception. That commitment is demonstrated through the professionalism and compassion of our owners. For individuals who are considering a viatical settlement, their personal representative provides a voice of understanding and serves as a trusted resource for help and information.

## Leadership that makes a difference

At LIBI, we operate with the highest ethical standards, carefully protecting the interests of our clients. To us, that means maintaining strict client confidentiality, offering fair payment for policies and encouraging

*From the first call to LIBI, each client works with a single client service representative, who is there to help every step of the way.*

effective regulation of our industry. We work closely with the National Association of Insurance Commissioners as well as federal and state governments to promote meaningful regulation of viatical settlements. LIBI works with numerous not-for-profit organizations across the country to help educate and inform the community about this important financial resource.

## What's important?

Choosing a company you trust. At LIBI, our strength, people, service and leadership make a difference to our clients and set us apart as the nation's leading broker of viatical settlements. We encourage you to find out more about how we can help you to someone you know.

**WHAT WOULD THE AUTHOR, BOB WRIGHT, DO IF HE HAD CANCER? The "Wright Stuff," of course!**

**IN THIS BOOK:**

- Read meticulously documented **Truth** about the AACI **Cancer Paradigm** and what it means for you and your family.
- **Be amazed by doctors** and medical professionals who know this Truth – some want you to know it, and some don't... Learn why.
- Learn what you absolutely **must do and stop doing** if you have cancer right now, and what you **must do** for cancer prevention.
- Understand detoxification and the cancer diet in plain English.
- Learn about the **American Anti-Cancer Clinic**: situated within a 100-acre plus cancer-healing complex in the Pacific Northwest, to which cancer victims can come from all over the world where all their needs will be met—medical, educational and nutritional, at less than one tenth the cost of current cancer care today. We believe that **"if we build it, they will come!"**

This Book represents our "bread and butter" fundraiser, so we greatly appreciate your purchase and thank you for supporting the AACI. \$12 of each book is tax deductible as a donation to the AACI under IRS Code 501© (3).
