The Wright Stuff

A Word from Bob Wright

It's that time of year again. Some call it "The Holidays," others "The Christmas Season." I prefer the latter, but you get to choose what you prefer.

Whatever the case, it is also the time when all non-profits (and others) reach out to their data bases and everyone else on planet Earth to solicit funding. Of course, the plea is to taxpayers who hope to gain tax benefits by donating before the end of the year to a certified, IRS-designated, 501©(3) not-for-profit entity. Let the games begin.

The War On Cancer

AACI Sponsor Highlight: Life Insurance Buyers, Inc.

Sadly, what we find is that many really give little regard to where their money goes or what it is used for. From my point of view, this goes beyond sad to tragic. It seems that little research is done into the who, what, why, and where part of the equation. Instead, as the lure of paying less taxes to the government hangs in the balance, we seemingly just write the check and mail it out to “whomever.” After all, they must be vetted and doing a good job. Not so fast.

When it comes to cancer, most Americans still believe that the “war on cancer” is still engaged and that we are making great strides. Don’t we hear about every two years that the cure is just around the corner – we just need a little more funding? Yeah, we’ve been hearing that for 43 years now, ever since President Richard Nixon declared the war on cancer back in 1971. Gee, some of you reading this weren’t even born then! How is that working for us?

Not well, it seems. After literally trillions of dollars spent, we are essentially no closer to the “cure” than we were over four decades ago. And, yet, we still fund this behemoth cancer machine with hundreds of millions of personal dollars each year. Where does that money go? Ask anyone on the street – or anyone who has recently given themselves – and you will get the usual reply, “to cancer research.” I call that the “huge, black, sucking hole where your donation disappears – never to be heard from again.”

Just like our American health care system (really a sick care system), the cancer industry has been hijacked by those who would rather profit from it than ever find that elusive “cure.” When we understand that there are more people working in the cancer business than those that actually have cancer (and there is no shortage of cancer patients) – we start to get the picture. According to the American Cancer Society, over 600,000 of us will die from this disease in the next year – I believe the number to be

way more than that. One of our family members dies of cancer every minute, of every day, of every week, of every month, of every year – and the numbers are getting worse – not better. And, more of us are dying from the treatments – not the cancer – today than ever before. Why? Why? Why?

I agonize over this last question every day. If I had to guess I would say that the majority of us just don't care. Those of you who follow this newsletter, the AACI, and my book, *"Killing Cancer – Not People,"* know that we have the solution to cancer and have had for decades. There are no secrets here! Or, at least there shouldn't be!

I'm not going to dig deep into this in this missive – you can find all of the details in the book. Suffice it to say that we both know what causes cancer – and what heals it. It doesn't appear that the local oncologist has received the news. We continue to pour chemicals and radiation into bodies in an attempt to heal a disease that is caused by chemicals and radiation. Have we gone mad? One would think so. It has never made any sense and never will. Still, it remains that modern medicine is bought and paid for by the pharmaceutical companies – and the mantra continues that "you will take your medicine or we will force it down your throat."

Sorry for being so explicit – but I think you get the picture. It's time to stop this nonsense, but I'm not so sure that Americans are ready. The American Cancer Society, Susan G. Komen, et al., will raise hundreds of millions of dollars this year from those who are looking for that elusive tax write-off with literally no regard for what really happens to their offering. On the other hand, the smaller organizations that are doing the real work to educate the public about cancer (and all chronic illness) – its prevention and true healing modalities – will receive very little or nothing at all. I would like to say that this is changing but, unfortunately, I don't see it.

For those of us who fall into the latter category – please understand that we are not “whining.” No, instead, we go out every day and do the work that matters. Working directly with the patients themselves, we help to affect changes that really make a difference. It works. People heal. And, there is no amount of money that you can put on that. Our reward rests in renewed spirits and healed bodies. And, that’s enough.

Having said that, we all must pay our own way to make this happen. But, it gets harder every year. For now we continue and will as long as we can. We hope for those organizations that we know and support who fall into the same boat. We ask you to support them.

At the American Anti-Cancer Institute and International Wellness & Research Center, we have made great strides this past year. This newsletter, and its ever growing base of subscribers that are hungry for the truth, testifies to that. We have counselled with more cancer patients over the past 12 months than ever before and have witnessed more healing testimonies as a result. We have grown our presence around the world, including very active Ambassadors in SE Asia, including Malaysia, Singapore and the Philippines. We continue to hold seminars around the U.S. and visited many cities this past year. Our book, *“Killing Cancer – Not People,”* advanced to its Third Edition this year – and it is bigger and better than ever. We have sold tens of thousands of this work without any advertising or marketing – just word of mouth.

So, we ask that this “Holiday Season/Christmas Season” you consider us worthy of your support. Our dollars don’t go to big salaries or overhead. We have many projects, however, on the drawing board for 2015 – if we are able. ***PrimaNeuvera*** and new facilities are among those. Being able to travel and reach out with the truth about cancer and other degenerative and chronic diseases is another goal. We need to continue to preach prevention – which is the real cure. As you can see, our plate is full, our bank account is not.

Of course, you can support us through direct donation which then allows us to direct the funding to the area of most need. That can be done through our website (under the “Join Us” drop-down menu at this link [here](#)) or through a check to the AACI, 2525 Broadway, Suite 2304, Everett, WA 98201. You can also sign up to be a monthly contributor to the AACI for amounts from just \$4.95 or \$9.95 to \$19.95.

In addition, all sales of the book benefit the organization directly. Consider buying a case (28) or at least several copies to give out to friends, family, or those that you know are in need. It makes a great Christmas gift.

If you have time and skills to volunteer, we are in need of those who are webmasters, fundraisers, project coordinators, etc. Just let us know.

In my own life I try to “walk the walk” rather than just “talk the talk.” We all fall down on this occasionally, but we get back up and continue. I am in my seventh year of literally “donating” my time to this organization and I will continue as long as God keeps me on this mission. Hopefully, my input will always be of value to those who need help regarding cancer and other diseases.

We covet your assistance – in whatever form it comes. Please consider this request. All donations to the AACI/IWARC are tax-deductible under the IRS Code regarding 501©(3) organizations. Our Federal Tax ID number is 94-3442051 for your records.

Director and Founder

American Anti-Cancer Institute

International Wellness & Research Center

Fermented Cod Liver Oil

I have written several articles on vitamin D – specifically, vitamin D3 – in the past and included an expose on it in the book, “Killing Cancer – Not People.” This is so important that I must continue to mention it at every opportunity.

The American People have been deceived when it comes to this “rogue” vitamin which probably would be better classified and described as a hormone. Here is an excerpt from the book, pages 90-91:

“The pure and simple fact is that vitamin D (specifically, D3) prevents 77% of all cancers! Did you get that? A study conducted by Creighton University School of Medicine that involved almost 1,800 women in good health proved that supplementation of calcium and vitamin D reduced cancer rates by an amazing 77% (as reported in the American Journal of Clinical Nutrition). The intake of vitamin D in the control group of this study was only 1,100 IU daily. Imagine what might have occurred if they were given 4,000-5,000 IU daily!

“You need vitamin D, especially vitamin D3 (cholecalciferol) to help process calcium and phosphorus and recent studies show that this substance, processed in the liver and kidneys, promotes the death of cancer cells. The problem is that the good food sources of vitamin D are not (for the most part) on the cancer diet: beef liver, salmon, mackerel, sardines, and egg yolks. So, where to you get it? From the two best sources, the sun and cod liver oil.

“Find a good cod liver oil, however. Most companies, believe it or not, are taking the natural vitamin D out and replacing it with a synthetic form of this vitamin (which then ceases to be a real vitamin at all). I take Green Pasture’s Blue Ice Fermented Cod Liver Oil. Listen to what Dr. Bruce West says about cod liver oil (CLO) in his recent ‘Health Alert’ Newsletter, May 2010, Volume 27, Issue 5:

“If you have had breast cancer, if you are at high risk for breast cancer, if you are afraid of getting breast cancer, or if you are just smart, you will take cod liver oil (CLO) for the rest of your life. Aside from being a sacred food and elixir that has profound and wonderful health benefits, CLO and its vitamin D are profoundly linked with breast cancer prevention.

“As we have stated previously, there are many forms of vitamin D. And there are still many forms of vitamin D that we simply do not even know about. So it makes sense to raise your levels with the whole food that is super-rich in the whole vitamin D with all its variations. That food is Blue Ice Fermented Cod Liver Oil. We use it in the form of capsules, with 2-5 capsules daily being the most common dose to bring vitamin D levels back to normal.” Thanks, Dr. West.

Please go [here](#) to read the entire, great article that Derek Henry of Natural News recently wrote about fermented cod liver oil.

Now, go get some. The best source for this true superfood comes from the company called Green Pasture. They produce what we feel is one of the greatest food supplements available today, Blue Ice Fermented Cod Liver Oil. Blue Ice is a Trademarked name owned by Green Pasture. ♦

Testimonial: ASEA

“My name is Naomi Zettl and I am an Integrative Health Practitioner on Vancouver Island, British Columbia. In 2011, I was diagnosed with a recurrence of thyroid cancer, a very serious condition. I was well aware of the seriousness as I had a previous tumor with cancerous nodules on my thyroid which were removed in November, 1999. This experience was so traumatizing, it definitely was the dark night of my soul and changed the trajectory of my whole life. A few months after this thyroidectomy, I was diagnosed with new growth on the existing left lobe of my thyroid. I was initially devastated, then angry at the medical system for not being proactive to supplement my thyroid, but then moved into a determination to heal. I immersed myself in healing at every level possible; emotionally, spiritually, mentally and physically. It has been quite a journey which has led me down a most beautiful path of healing and helping others with their health and well-being but, unfortunately, did not change too much the state of my thyroid.

“As our lives have many ups and downs, the health challenge I was faced with again in 2011 of thyroid cancer felt so daunting and overwhelming. My partner and I had many stresses – financial and otherwise – and we had a 7-month old baby. I was being pressured by two endocrinologists and a surgeon to have immediate thyroid surgery and cancer treatment. I was also experiencing severe post-partum depression.

“I was introduced to ASEA in February of 2012 in Tucson, Arizona – and it was sure an answer to my prayers. Against my doctor’s orders, I delayed all procedures as much as possible, including surgery, as I was feeling an immediate difference with the ASEA

within the first two weeks. At first, I thought it was a placebo effect, but as I started having more blood work, biopsies, and subsequent ultrasounds every six months, I continued to show improvement in my thyroid condition. The triple biopsy by ultrasound showed no cancerous cells and further ultrasounds showed continued improvement as the nodules had been shrinking and even disappearing all together. The thyroid region is also free of debris in the fluid surrounding the thyroid. This is all great news – I am so grateful!

“My family doctor has been supportive throughout my journey with ASEA and has been watching with amazement as my results continue to shift in a more positive direction. In the past 14 years, I have searched far and wide for supplements and therapies to help heal my thyroid condition. I had not come across anything that had changed it until I found ASEA. The scientific discovery of ASEA is a game changer for me, and I am forever grateful for ASEA. I thank God for ASEA – for when our cells work better together, everything works better in our being and in our world. Thank you for allowing me to share my story.”

Thank you, Naomi. From the book, *“Killing Cancer – Not People,”* on what ASEA is:

“ASEA is said to utilize a patented method for creating and stabilizing molecules native to the human body which provides a pathway to deliver critical ‘reactive molecules’ – molecules that are deemed necessary for maximum cellular health.”

So, many of you are asking just exactly what that means. Again, from the book, page 239:

“Through its ‘Redox Signaling’ – as this process above is defined and known – ASEA boosts the efficiency and effectivity of the body’s super anti-oxidants, superoxide dismutase (SOD) and glutathione, by as much as 500%. A recent study also demonstrated that ASEA will increase the uptake of antioxidants while minimizing inflammation. All of this is good news for cancer patients and the human immune system.”

Please keep in mind that no one, not me, not Naomi, nor the company that produces ASEA is saying that this product will cure cancer. No one can say that. The only thing that can heal cancer is the human immune system. What we do know and can say is that boosting the SOD and glutathione in the body by 500% will certainly supercharge the immune system. You can take it from there. ♦

Dangers of Abdominal Fat

Did you know fat around the abdomen, commonly referred to as intra- abdominal fat, or visceral fat, surrounding the stomach, kidneys, liver, and intestines, is **HIGHLY** dangerous to overall health?

This visceral fat is linked to cardiovascular disease, diabetes, mental de- cline, hormone disruptions, and an overall increase in most illnesses and dis- eases?

By implementing simple, affordable changes to overall lifestyle, such as better food choices, avoiding toxins, daily detox and exercise; visceral fat can be drastically reduced in a safe manner, at a steady pace.

Adding six to eight servings of organic vegetables and fruits daily allows the body to hydrate, be nourished, feel satiated, and utilize vitamins and minerals necessary to stimulate the elimination of excess visceral fat.

The soluble fiber in vegetables and fruits ferments inside the intestines; aiding in proper elimination of toxins released by the visceral fat, and replenishing the beneficial bacteria necessary to boost the immune system during detox. These fermented soluble fibers also enhance the body's ability to regulate blood glucose, and improve healthy cholesterol levels.

This Week's Wealth tip is to eat vegetables and fruits with high amounts of soluble fibers, in order to reduce visceral fat. As always, choose

Jenevieve Fisher
Executive Director
Educate A Cure

organic. Try carrots, onions, broccoli, peas, barley, oats, legumes, and beans, fruits such as apples, bananas, pears are excellent sources of soluble fiber. Chew your food until it is liquid in your mouth, eat slowly and enjoy your food; eat until you are satisfied, NOT FULL, and nourish your body each day. ♦

Where's Bob?

Bob will be speaking in the Banquet Room at “The Homestead,” 115 E. Homestead Blvd., Lynden, WA, on Tuesday, December 16th. Books will be available for sale (and signed by Bob!) and there will be a suggested donation at the door of \$5 that will go to the American Anti-Cancer Institute/International Wellness & Research Center. Bob will speak from 7:00 – 8:30 p.m. with book signings both before and after. All are welcome to attend.

On Saturday, January 17th, Bob will also be speaking at the Dayton Vineyard Church, 4051 Indian Ripple Road, in Beavercreek, Ohio. The event will run from about 10:00 a.m. to as late as 4:00 p.m. He has much to talk about – including introducing some new therapies and protocols that have shown great success with cancer patients – and others, ranging from heart disease to neurodegenerative diseases like Parkinson's and Alzheimer's. You don't want to miss this! The Vineyard is a mega church located just off of I-675 on Indian Ripple Road in this Dayton, Ohio suburb. The new Third Edition of the book, “Killing Cancer – Not People” will be available and Bob will be signing and individualizing them both before and after the actual event.

Come as you are. This is part of Bob's “No Suits, No Ties - All Truth, No Lies” tour – so don't expect to see him in a suit and tie! ♦

Detox & Cleanse

Judy Seeger is a Naturopathic Doctor (ND) – and one of the best there is. I say that first of all because I know Judy and her extreme capabilities. But, I also know that the real good doctors understand the relationship between healing and detoxification. Without a process by which the heavy metals and toxins are removed from our internal organs and tissues, wellness becomes increasingly elusive.

Dr. Judy understands this and treats detox as a primary – not secondary – treatment for healing. You should, too. Judy is a member of the American Anti-Cancer Institute and International Wellness & Research Center Advisory Board of Directors. And, we are blessed to have her.

Are you ready to cleanse and detox? If you've had chemo or radiation, it's important to eliminate those poisons! Learn how to do just that by joining Judy's Inner Circle. Judy has over 35 years' experience in the Alternative Medicine field and has been the director of two holistic healing centers. Join Judy to learn how to detox poisons out of your body. She offers Video Instructions, In-depth Webinars, plus an online TV show to get you on track, and keep you on track!

Now venture out to her website at www.JudySeegerDetox.com. Consider becoming a member of Judy's Inner Circle. If you need to detox (we all do!), you will be glad you did. ♦

Testimonial: T-Rex Fit

The following testimony comes from Ryan, the young father of Ryder, a 20-month old boy with neuroblastoma. Sadly, most young children with this form of cancer die when they are treated solely with chemo, surgery, and radiation. Diet is critical to these kids – in fact, it is the baseline to what helps them to survive. We began working with this family about 6-8 months ago.

“Hey Bob,

Been meaning to tell you the good news. We got another MRI last week and the remaining tumor has continued to shrink ‘chemo-free!!’ Not by much, but enough for even the oncologist here to say he thinks we made the right decision and he’s comfortable going another 3 months before getting another MRI. Still hitting the natural stuff hard but it was great validation to know what we’re doing is working.”

Here’s another story from a 76-year old man who loves sharing the benefits of his T-Rex Fit machine (remember, whole body vibration?).

“I have used the T-Rex for 2 weeks and my waist is down 1” and weight down 8 pounds. The vascular issue in my legs is resolving and neuropathy symptoms in both feet resolving. It is great to have the T-Rex in my home and the days of spending 2 hours to travel to the gym, workout, shower, etc., are over. I use the T-Rex 3 to 5 times daily. Awesome is the best word I can use.”

-Nehemiah Nowlen

Friends, if you have cancer, heart disease, neuropathy, auto-immune disease (fibromyalgia, lupus, rheumatoid arthritis, etc.), low bone density, circulatory problems, weight problems, neurodegenerative disease (Parkinson's, Alzheimer's, etc.) – or virtually any other sickness or chronic illness – you should be investigating this new equipment and technology in whole body vibration offered by the revolutionary T-Rex Fit machines.

The results we have been seeing and hearing about are nothing more than amazing and, some, seem unbelievable! These machines are easy to assemble (20 minutes), easy to operate, and all that many people need to do is just stand on them – that's how well they work! At the AACI and IWARC, we give these our highest recommendation. All people with serious health issues should consult with their physician first for clearance to utilize whole body vibration.

For more information, research studies, or to acquire a machine, go to www.bob.t-rexfit.com. ♦

The War on Cancer – Linus Pauling

Many of you may know that Linus Pauling was the recipient of two Nobel Prizes and a pioneer with Dr. Ewan Cameron in the development of the vitamin C protocol to fight cancer – and all other illness.

Their trials showed beyond any doubt that large volumes of intravenous ascorbic acid (later, sodium ascorbate) were effective and efficient in the treatment of cancer. Folks, it worked.

As a result, the only logical thing for the establishment to do was to try and ruin Pauling, his associates – and sabotage his work. Sadly, that worked as well and the primary reason that high-dose vitamin C is not a mainstay of cancer treatment today within conventional medicine. After all, it's really cheap – and there's no money in it for the pharmaceutical companies and the allopathic medical beast.

We believe in it and new studies continue to shout its efficacy, albeit, in super-high, continuous dosages.

Many of you also have heard the story of Dr. Ralph Moss, the PhD and former Assistant Director of Public Affairs at Memorial Sloan Kettering Hospital who was instructed by the Hospital back in 1977 to lie about the

very positive studies done on Laetrile (amygdalin) and its cancer-killing characteristics that had been observed within that establishment. He didn't lie – instead he told the truth and was fired the next day for his honesty. (See his entire story – written by himself at www.whale.to/cancer/ralph_moss_story). This is a great read.

All of the foregoing is to point you to a two paragraph letter (our quote of the month) from Linus Pauling to Dr. Moss. From this letter was taken one of the most famous quotes on the cancer industry ever written – and, we deliver it as follows:

“Everyone should know that the ‘war on cancer’ is largely a fraud, and that the National Cancer Institute and American Cancer Society are derelict in their duties to the people who support them.”

- Linus Pauling

Amen.

The original letter can be found at the following link:

www.dl.dropboxusercontent.com/u/5994678/1Hosted%20Images/linus_pauling_letter_derelict.pdf. ♦

SPONSOR HIGHLIGHT

A financial service for using life insurance today™

For millions of people who are living with a serious illness such as cancer, heart disease, Alzheimer's or AIDS, the high cost of medical care can quickly deplete essential resources. The same is true for many people over the age of 75 who have complicating health factors. Just putting money aside for basic expenses such as groceries and mortgage payments can be a challenge. LIBI gives people a place to turn for additional resources. Through a financial service called a viatical settlement, we enable people to sell their current life insurance policies for a percentage of the total face value. The money people receive may be used for any purpose and, in most cases, is free of federal income tax obligations.

LIBI can help open the door to new possibilities—such as fewer financial worries, new options for medical care and additional resources to share with family and friends.

All of us have our own sense of what's important, whether it's reaching a long-held goal, spending time with family and friends or enjoying the simple pleasures of each day.

What sets Life Insurance Buyers, Inc. apart

People place their trust and confidence in LIBI for many reasons—the financial strength and stability of our company, the experience and commitment of our people, the range and quality of our services, and the leadership and integrity of our organization. These are the qualities that set LIBI apart as the industry's top broker. LIBI has helped convert millions in policies into accessible funds for hundreds of individuals in need. In every relationship, we take the time to learn what's most important to our clients and to provide them with the resources they need, in a timely and confidential manner.

LIBI
LIFE INSURANCE BUYERS, INC.

Since 1995

*Working with
cancer patients and
their families for
over 15 years.*

People who put clients' needs first

We truly understand that people place their trust in us every day—to treat them fairly, to deliver what we promise and to be there when they need us. Our mission is to live up to those expectations every time, without exception. That commitment is demonstrated through the professionalism and compassion of our owners. For individuals who are considering a viatical settlement, their personal representative provides a voice of understanding and serves as a trusted resource for help and information.

Leadership that makes a difference

At LIBI, we operate with the highest ethical standards, carefully protecting the interests of our clients. To us, that means maintaining strict client confidentiality, offering fair payment for policies and encouraging

From the first call to LIBI, each client works with a single client service representative, who is there to help every step of the way.

effective regulation of our industry. We work closely with the National Association of Insurance Commissioners as well as federal and state governments to promote meaningful regulation of viatical settlements. LIBI works with numerous not-for-profit organizations across the country to help educate and inform the community about this important financial resource.

What's important?

Choosing a company you trust. At LIBI, our strength, people, service and leadership make a difference to our clients and set us apart as the nation's leading broker of viatical settlements. We encourage you to find out more about how we can help you or someone you know.

WHAT WOULD THE AUTHOR, BOB WRIGHT, DO IF HE HAD CANCER? The "Wright Stuff," of course!

IN THIS BOOK:

- Read meticulously documented **Truth** about the AACI **Cancer Paradigm** and what it means for you and your family.
- **Be amazed by doctors** and medical professionals who know this Truth – some want you to know it, and some don't... Learn why.
- Learn what you absolutely **must do and stop doing** if you have cancer right now, and what you **must do** for cancer prevention.
- Understand detoxification and the cancer diet in plain English.
- Learn about the **American Anti-Cancer Clinic**: situated within a 100-acre plus cancer-healing complex in the Pacific Northwest, to which cancer victims can come from all over the world where all their needs will be met—medical, educational and nutritional, at less than one tenth the cost of current cancer care today. We believe that **"if we build it, they will come!"**

This Book represents our "bread and butter" fundraiser, so we greatly appreciate your purchase and thank you for supporting the AACI. \$12 of each book is tax deductible as a donation to the AACI under IRS Code 501© (3).
