I know something that you should know and don't tell you – is my 'truth vow' still intact?" Interesting. Here's my take on it. I believe in "sins" of commission (you did it) and sins of omission (you should have done it but didn't). Some don't ascribe to the latter, but I believe that we should all do what is right – no matter what.

In keeping with that belief, I must make sure that you know who I am, understand what drives me, know how I live (does Bob really do these things he preaches that we should do), and what I would do if I had cancer or any of 100 other dis-eases that inhabit human bodies. In other words, you don't want food and diet advice from a bulimic or an anorexic person, nor do you desire an exercise program from a couch potato. I'm the same way. I want to take advice from someone who has been through it – been there and done that – and has had a degree of success at it. I believe most of us would agree on this.

As many of you know, I will turn 67 this month (July). I have been blessed to be an outdoorsman, runner, and athlete for most of my life. I have had no serious illnesses, diseases, accidents, or operations – so far. While my friends and family are having knees and hips replaced, by the Grace of God mine remain fine despite the fact that I have used and stressed mine a whole lot more. Many of my classmates from high school have passed on and others have serious medical conditions – including cancer.

So, here is where I lay my cards on the table and flee from any sins of omission. On March 29th of this year, about three months ago, I went out for a long, hard run of about 5 miles. I walk before and after the run to warm up and cool down – about  $\frac{3}{4}$  mile each. So I covered a lot of ground that day. When I returned home I felt great. I showered, dressed and was about to sit down for a short rest when I noticed something was wrong.

My heart had accelerated to about 130 beats per minute – it was pounding. I knew almost right away what it was, but it made absolutely no sense to me. I was in a-fib (atrial fibrillation). Of course, my immediate thought was that this could not even be remotely possibly. After all, I had just run a long distance with no problems and my endurance was strong. I sat down for about 5-10 minutes to see if it would stop. It did not. I was off to the hospital where I stayed and went through testing for about 3 hours before they released me – with you know what – drugs to slow the heart down.

I am not a fan of drugs and had not taken any prescription drugs in my life. This was hard for me. I do believe that they have a time and a place – but those instances should be more rare than commonplace. I'm sure the doctor was not pleased with me when I told him I did not want to take any drugs. So, I agreed that I would for a short period of time but immediately began to investigate what common foods, herbs, supplements, etc., could be used in lieu of these that would accomplish the same thing.

Because of the nature of a-fib (fluttering atria), they want you to be on blood pressure medicine and blood thinners. My studies showed that these thinners (Coumadin, Xarelto, etc.) were very toxic and, like most drugs, one of the side-effects was death. After consulting with a physician friend of mine, it was decided that we could replace the blood thinner with 3,000 mg of fish oil in the morning and 50 – 100 mg of nattokinase or lumbrokinase in the evening. These natural substances would do the same job as the chemical thinners – but with more benefits and no side-effects. To deal with the a-fib itself, I am now taking a very good Hawthorne Blend supplement and some pico-magnesium and other minerals. The hope is that these things (along with the right diet and right water, of course) will help to get me off the last drug that deals with the arrhythmia. Time will tell.

I almost immediately got back to walking and have been mixing that up with some running over the past month or so. I know how important exercise is – in almost any situation.

You know, this has been pretty hard for me. Admittedly, I am not a good patient – especially for those in allopathic medicine. I realize they are trying to do their best with the limited tools that they have and within the AMA’s “standard of care.” However, their results are increasingly abysmal.

I understand that I am not in control of the final outcome. But – and as I tell readers of this newsletter all the time – I prefer quality over quantity when it comes to life. If I have 30 minutes left, or 30 years, I want that time to be spent with a high quality of mobility and health. I don’t want to live to be 90 or 100 and spend the last 30 years in a disabled or vegetative state. I think that the majority of us would prefer to let the light burn bright and then blow out – instead of having it get a little dimmer each year.

Whatever the case, I’m in it for the long haul. As long as God gives me another breath I will continue to write this newsletter and work with cancer patients (and others) every day. That’s what I have been blessed to do. I continue to believe there is hope for all of us. Whether we are inflicted with cancer, diabetes, auto-immune disease, neuro-degenerative disease – or a-fib – there is hope. If this is you, I hope you choose to stay the course and investigate those things that have been shown for millennia to bring us health and healing. In this search, attitude is everything and hope will get us over that last hill sometimes when it seems that nothing else will.

So, now you know a little more about me. I'd like to think that I don't just "talk the talk," but I also "walk the walk." And, I will continue to do so as long as I can.

## The Big Lie Continues

The following article was posted in Sayer Ji's [GreenMedInfo.com](http://GreenMedInfo.com) Newsletter and was written by Ali Le Vere. It references an article in USA Today that states that coconut oil isn't healthy. Yeah, right. Sadly, the media gets it wrong again as they are continually pushed forward by Big Pharma, the FDA, and the AMA. Of course, the real truth is that coconut oil is one of the healthiest foods you can put in your body – and always has been. Big Food doesn't want you to know this so they would rather you eat plastic (margarine), and contaminated vegetable oils that have been hydrogenated and come from GMO crops. Go to your grocery store and gaze upon all the oils that you can buy there. Keep this in mind however – most of them are already rancid and commercial perfumes have been placed in them to cover up the smell. Then, go buy coconut oil.

### In Defense of Coconut Oil: Rebuttal to USA Today

by Ali Le Vere, B.S., B.S.

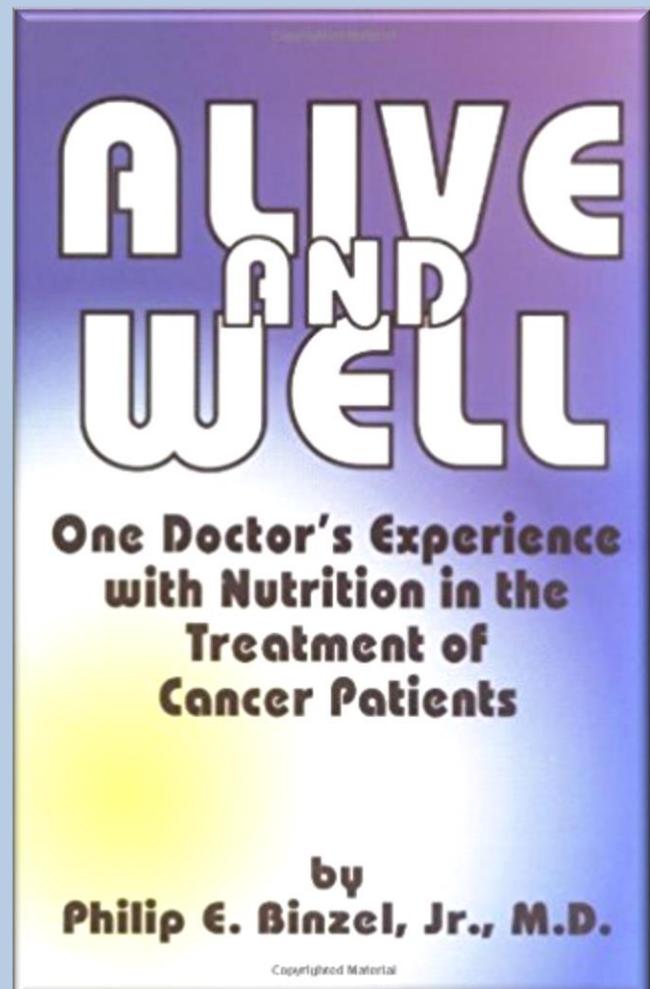

By now, I'm sure you've seen the USA Today article entitled, "Coconut oil isn't healthy. It's never been healthy". Fear-mongering, attention-grabbing headlines certainly sell copy, but do not make for evidence-informed, high quality science reporting. [Click to Read.](#)

## Proof in the Pudding

Dr. Philip Binzel, M.D., was a small-town doctor and a graduate of St. Louis University School of Medicine. Dr. Binzel promoted nutritional therapies and laetrile for over 30 years and his success record was outstanding. From his book, *Alive and Well*, Chapter 14, comes the following exceptional, explanatory information:

*“When a patient is found to have a tumor, the only thing the doctor discusses with the patient is what he intends to do about the tumor. If a patient with a tumor is receiving radiation or chemotherapy, the only question that is asked is, ‘How is the tumor doing?’ No one ever asks how the patient is doing. In my medical training, I remember well seeing patients who were getting radiation and/or chemotherapy. The tumor would get smaller and smaller, but the patient would be getting sicker and sicker. At autopsy we would hear, ‘Isn’t that marvelous! The tumor is gone!’ Yes, it was, but so was the patient. How many millions of times are we going to have to repeat these scenarios before we realize that we are treating the wrong thing?”*

*“In primary cancer, with only a few exceptions, the tumor is neither health-endangering nor life-threatening. What is health-endangering and life-threatening is the spread of that disease through the rest of the body.*

*“There is nothing in surgery that will prevent the spread of cancer. There is nothing in radiation that will prevent the spread of the disease. There is nothing in chemotherapy that will prevent the spread of the disease. How do we know? Just look at the statistics! There is a statistic known as ‘survival time.’ Survival time is defined as that interval of time between when the diagnosis is first made in a given patient and when that patient dies from his disease.*

*“In the past fifty years, tremendous progress has been made in the early diagnosis of cancer. In that period of time, tremendous progress has been made in the surgical ability to remove tumors. Tremendous progress has been made in the use of radiation and chemotherapy in their ability to shrink or destroy tumors. But, the survival time of the cancer patient today is no greater than it was fifty years ago. What does this mean? It obviously means that we are treating the wrong thing!*

*“The only thing known to mankind today that will prevent the spread of cancer within the body is for that body’s own defense mechanisms to once again function normally. That’s what nutritional therapy does. It treats the defense mechanism, not the tumor.”*

Well said, Dr. Binzel. Fact not fiction, based upon years of study and treating patients. Must be more of the “empirical evidence” stuff. Dr. Binzel wrote his book in 1994. The information between its covers is still relevant and accurate today – 23 years later.

## **Soul by Rain International: Testimonials**

contributed by Bradford S. Weeks, M.D., The Seed Doctor™

### ***Autism***

*Thank you for the generous gift of the Soul product. Your gift has been of great benefit to my autistic son. I am seeing positive signs the Soul product. The Soul product clearly seems to calm him: less hand flapping, better eye contact and better skin, especially under his eyes which have always had dark circles under them. I give it to him 3 times a day, every six hours. I have tried many products but I have never seen something work so well. I am hopeful that over time and with continued use we will continue to see improvements. He loves the stuff as he knows it is good for him. Again, thank you for helping my son and my family.*

### ***Plantar Fasciitis***

*I have had plantar fasciitis for 5 years and tried everything - PT, OT, acupuncture, massage therapy, chiropractic, rolfing, medications, injections with steroids and nothing helped. You sent me sample of SOUL and, while I was on the phone with you, I drank 50% of a packet and rubbed the rest of the SOUL on my feet and whereas at the start I was suffering 6/10 pain, after 5 minutes there was no pain - I could stand and there is no pain! This is amazing.*

## Moms Across America releases powerful new documentary exposing toxicity of GMOs and glyphosate

by Mike Adams, posted on [NaturalNews.com](http://NaturalNews.com)

*AACI/IWARC note: In a follow-up to Ali Le Vere's article regarding coconut oil, here is another that appeared in Natural News as written by Dr. Jack Wolfson. I guess the American Heart Association will stop at nothing to keep those patient dollars rolling in.*

([Natural News](http://NaturalNews.com)) [Moms Across America](http://MomsAcrossAmerica.com) has just released a powerful new video called “Communities Rising” that exposes the devastating toxicity of GMOs and glyphosate. Watch the video now [at this YouTube link](#), or watch it below.

“This film highlights everyday citizens across the world that are taking matters into their own hands, healing their families, raising awareness about organic food, and changing local pesticide policies,” filmmaker Zen H. told Natural News. “I’m confident that we’re in the process of ending this chemical era and taking back our food supply.”

GMOs and glyphosate are the leading toxins used in the mass poisoning of our children and our food soils. This mass poisoning is being

underwritten and promoted by the deceptive media, prostituted science shills (who are routinely bribed to promote toxic poisons) and even [Monsanto-funded “smear” groups](#) that attack clean food activists. That’s why it’s so important that you not only watch this film but share it with others.

Every mom in America needs to see this documentary. Every consumer of food urgently needs to be informed of the systemic poisoning that’s being conducted right now, across nearly the entire U.S. food supply.

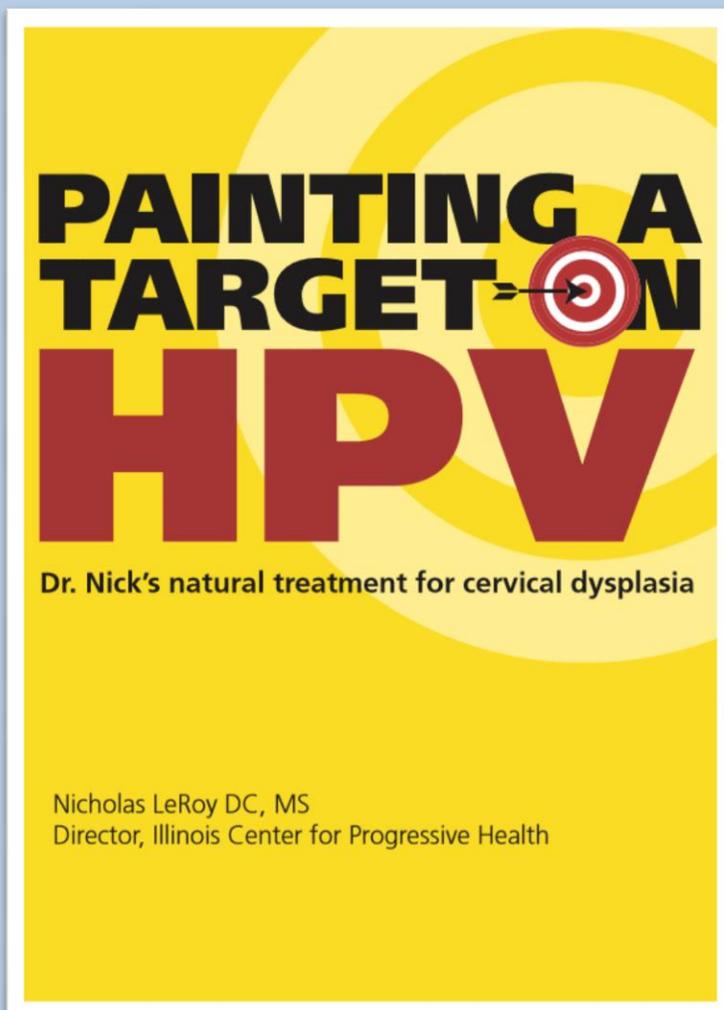

Watch this important film below, share it with others, and visit [MomsAcrossAmerica.com](#) to join the movement. Read [Glyphosate.news](#) for more breaking news and science headlines on the toxicity of this deadly chemical that’s being sprayed on food crops all across this nation. All our lives are at stake. We either stand up against this mass poisoning or we die of cancer, Alzheimer’s, depression, suicide and other serious diseases caused by a toxic food supply that’s been poisoned on purpose.

## Human Papilloma Virus (HPV)

If I had a young daughter now I would never allow her to get the HPV vaccine (Gardasil & other names). The number of children harmed by this poison are becoming legion – and easily over 100 have died. The truth is that most HPV infections will resolve on their own. And now they are trying to mandate these vaccines to both girls and boys nationally. Some states have already done it.

Folks, vaccines (of all kinds) have recently surpassed all other drugs as the number one money maker for the pharmaceutical companies. These include MMR (measles, mumps, rubella), flu shots (almost totally ineffective), Hep B (given to one-day old children and harming them irreparably), etc.

For those of you with young children, or anyone struggling with HPV in any of its forms, please acquire a copy of Dr. Nicholas LeRoy's book, "Painting a Target on HPV." This is Dr. Nick's natural treatment for cervical dysplasia (HPV) and it appears to work virtually every time.

Part of what you will learn in this book includes how to eliminate HPV and prevent

the process of malignant transformation, the research that supports nutritional supplementation and dietary changes to help eliminate dysplasia and HPV, and how escharotic therapy can cure even the most difficult cases of severe dysplasia (CIN3) without surgery.

Please consider getting this book into your own natural healing library as quickly as possible. Go to [www.drnick.net](http://www.drnick.net) and you can acquire this on his site. If in the Chicago area, you can make an appointment by calling 312-243-3338.

## **Kangen Water Testimonial: A Message to Bob**

*As your note also mentioned I have been encouraging my friends to drink the water within 48 hours, realizing that its efficacy diminishes rapidly over time, and I also credit chapter 6 of your book for helping me to make the decision to invest in the Enagic SD-501. It has been a blessing for my daughter (a Hodgkin's lymphoma survivor), my family and friends, and myself. I have great compassion for the many people I meet who are struggling with decisions regarding cancer in themselves or a loved one, and I have shared my copy of your book with them, as well my collection of books by Tanya Harter Pierce, Ty Bollinger, and others, along with my admonition for them to start their own 'library' of reference books like these to know the truth, and to obtain the freedom that knowledge of the truth brings! This is simply my feeble effort to help them to wake up and think for themselves, which I believe is a necessary early step to avoid becoming a statistic!*

*Robert, I look forward to reading and recommending more of your books and your site to others, and wish you every blessing as you continue the good fight against the lifestyle diseases from which our society is suffering. It is through the tireless efforts of caring folks like you that so many have real hope for recovery.*

*May God bless you in your work,  
~ Bill*

## **The PIOH Institute Inc.**

*AACI/IWARC note: People travel from all over the United States and Canada to see my friend, Dirk Yow, at his PIOH Center in Burien, Washington. Located right next to Seattle Tacoma International Airport, it is easily accessed by those wanting to do whole body, down-to-the-cellular-level detoxification. Some people fly in and spend a week or two and do what Dirk refers to as “intensives.”*

*Unlike anything you have ever seen (or done), PIOH (precision intestinal oxidative hydrotoning) has achieved critical acclaim as possibly the best detox methodology ever invented. Dirk spent 35 years perfecting the system that he uses and the testimonials are incredible. I have written about this in Chapter 9 of my book, “Killing Cancer – Not People.”*

*To date, I have had about 36 of these sessions, utilizing them for prevention and to get years of “crud” out of my body. We have seen cancer patients healing well, then all of a sudden, the healing stops. I can tell you that the toxins and heavy metals in our bodies can make this happen. I recommend these sessions to everyone. If you have questions, contact the master himself, Dirk Yow, at 206-459-0102 and/or [alightingonwater@gmail.com](mailto:alightingonwater@gmail.com). You will be forever glad that you did.*

As a specialist in the field of educating seekers who come in to see me for detoxification, I sometimes cringe at the litany of chemical horrors I witness coming out of peoples’ bodies! The toxic overloads most people carry truly make them walking test tubes. Yet, because I see the tragic consequences of our highly toxic environment in my practice every day, I remain convinced that we must increase our diligence in monitoring the

use of these chemical compounds and ways to relieve and rid the body from these substances.

One such resource for this assistance is water. Bob Wright and other authors have written much on the importance of water. I have worked with this most amazing of elements, water, in my practice for over 36 years. By the end of this article, I hope to have convinced you not only of your need for plenty of this magical elixir, (and it's use for both ends of the body) but that you will understand the vast importance of keeping our supplies of it fresh and pure!

By some estimates, humans are made up of as much as 75% water. Since two-thirds of the planet is made up of water, we must have plenty of it, right? Wrong. Of all the water in the world, only 3% is drinkable. A sampling of recent headlines underscores the problem: "People reacting to chloramines in water," "Pesticides found in rivers," "Pesticide use – Male fertility," "Unborn babies carry pollutants," "Pharmaceuticals in our drinking water," – almost every week another headline surfaces about another study in yet another contaminated water or food supply! Perhaps, you say, these are just small amounts of pesticide (or chemical, or toxin). Perhaps a little bit won't hurt me too much. Yet a little bit, added to a little bit more, slowly accumulates into potentially dangerous levels in our bodies.

There are many unintentional additives in our water, like those in shampoo, cleansers, soaps, even traces of our daily flushing of our wastes, can be found. Now, let's look at some of the substances purposely added to our water supply, like fluoride. Fluoride is a toxic waste by-product from phosphate fertilizer production. It is not food grade quality, is not FDA-approved and comes contaminated with lead and arsenic. Fluoride is more toxic than lead and only slightly less toxic than arsenic, yet it is allowed into our water at 80 to 266 times the amount allowed for lead and arsenic!

According to a 2000 article in the Journal of the American Dental Association, the benefits from fluoride are topical, not systemic. In fact, all current scientific research and statistics show this practice to not only be ineffectual, but downright dangerous. Excessive ingestion of fluoride causes dental fluorosis, a condition which damages the tooth enamel during the formative childhood years, when teeth cells are developing.

In my years of experience as a PIOH Practitioner, I have witnessed many incredible situations. I remember one client who came in severely compromised in health. Growing up in a rural farming community, she had, without realizing it, been subjected to high levels of pesticides and fertilizers. As an adult, she saw doctor after doctor for her symptoms, all of whom prescribed various medications for the myriad of symptoms. None of her doctors knew what the others were prescribing, and in time she was ingesting 14 different drugs in all, in addition to the handfuls of aspirin she took regularly.

This woman's blood literally began to boil from the drug combinations, and she ended up suffering 1st to 3rd degree burns from the inside out. Diagnosed as a case of "spontaneous combustion" the unique combination of substances literally burned over 90% of her body!

Sounds incredible, I know. But as extreme as this example is, it shows how toxic substances can combine and cause varied and sometimes extreme symptoms from one person to the next. I have seen over and over, no matter what the health of the individual, the influence of pure water in keeping the blood clean and providing many other amazing benefits!

As illustrated by the two testimonials, no matter what your health, you can benefit from water!

## Testimonials:

*"I came to White Heron PIOH because of hearing about a close friend's experience with Dirk. I was not experiencing any extreme health issues at the time but rather wanted to take another step towards greater health, more energy and hopefully lose a few pounds in the process. After a consultation with Dirk, it was clear that my body was in need of a much deeper cleansing than what I had been giving it on my own. After doing 13 ceremonies with Dirk, I am SO grateful that I started this process. His unique approach to colonics has supported my body in ridding itself of toxins long buried in my tissues that would have created bigger health issues if left unaddressed going forward. I could have never experienced these kinds of results in such a short period of time as I have with PIOH. I don't have health insurance and I feel this is the best money I could spend instead of health insurance premiums that would never be able to give me the same level of health in return. I am glad I have taken my health into my own hands. Thank you so much Dirk!"*

*~ M.L.*

*"Ten years of suffering led me to a chance meeting with an acquaintance who told me I should try out White Heron PIOH. If I hadn't gone out on a limb and trusted in her story and review of the process, I would probably not even be able to write this review. Depression had taken a major hold on me and I was barely able to care for myself and my four children due to the debilitating symptoms I was experiencing. Chronic diarrhea, constipation, debilitating fatigue, weight loss, heart palpitations, anxiety, and the list go on. I was malnourished and sick almost every single day of the week, and at age 37, a mother of four children, I never thought my life would be plagued with so much illness. I simply did not want to live anymore, but the desire is there for my husband and children kept me searching*

*for answers. So, I made the inquiry and set up an appointment with White Heron. After my first two sessions, I finally began to feel better and extremely hopeful in my body's ability to heal! He truly wanted to know each and every symptom I was suffering from, physically and psychologically, taught me how the PIOH works and things to do at home to further the healing process. Since I began my sessions in the spring of 2016 I have not had one single bout of diarrhea and have finally been able to enjoy life again. I have had to work for it, and it has not been an easy path by any means, but it has been the one successful medium through which I have begun to feel healthy and hopeful about my future. I have been able to make plans, take my children places, exercise a little, travel without a stash of Imodium and anti-nausea meds, and actually enjoy eating again! If you are struggling with chronic illness, whether it is a firmly diagnosed condition or, like so many, a mysterious number of worsening symptoms that doctors cannot diagnose, please read Wheels of Wellness, and consider White Heron PIOH."*

# SPONSOR HIGHLIGHT

## A financial service for using life insurance today™

For millions of people who are living with a serious illness such as cancer, heart disease, Alzheimer's or AIDS, the high cost of medical care can quickly deplete essential resources. The same is true for many people over the age of 75 who have complicating health factors. Just putting money aside for basic expenses such as groceries and mortgage payments can be a challenge. LIBI gives people a place to turn for additional resources. Through a financial service called a viatical settlement, we enable people to sell their current life insurance policies for a percentage of the total face value. The money people receive may be used for any purpose and, in most cases, is free of federal income tax obligations.

*LIBI can help open the door to new possibilities—such as fewer financial worries, new options for medical care and additional resources to share with family and friends.*

All of us have our own sense of what's important, whether it's reaching a long-held goal, spending time with family and friends or enjoying the simple pleasures of each day.

## What sets Life Insurance Buyers, Inc. apart

People place their trust and confidence in LIBI for many reasons—the financial strength and stability of our company, the experience and commitment of our people, the range and quality of our services, and the leadership and integrity of our organization. These are the qualities that set LIBI apart as the industry's top broker. LIBI has helped convert millions in policies into accessible funds for hundreds of individuals in need. In every relationship, we take the time to learn what's most important to our clients and to provide them with the resources they need, in a timely and confidential manner.

**LIBI**  
LIFE INSURANCE BUYERS, INC.

*Since 1995*

*Working with  
cancer patients and  
their families for  
over 15 years.*

## People who put clients' needs first

We truly understand that people place their trust in us every day—to treat them fairly, to deliver what we promise and to be there when they need us. Our mission is to live up to those expectations every time, without exception. That commitment is demonstrated through the professionalism and compassion of our owners. For individuals who are considering a viatical settlement, their personal representative provides a voice of understanding and serves as a trusted resource for help and information.

## Leadership that makes a difference

At LIBI, we operate with the highest ethical standards, carefully protecting the interests of our clients. To us, that means maintaining strict client confidentiality, offering fair payment for policies and encouraging

*From the first call to LIBI, each client works with a single client service representative, who is there to help every step of the way.*

effective regulation of our industry. We work closely with the National Association of Insurance Commissioners as well as federal and state governments to promote meaningful regulation of viatical settlements. LIBI works with numerous not-for-profit organizations across the country to help educate and inform the community about this important financial resource.

## What's important?

Choosing a company you trust. At LIBI, our strength, people, service and leadership make a difference to our clients and set us apart as the nation's leading broker of viatical settlements. We encourage you to find out more about how we can help you to someone you know.

WHAT WOULD THE AUTHOR, BOB WRIGHT, DO IF HE HAD CANCER? The "Wright Stuff," of course!

**IN THIS BOOK:**

- Read meticulously documented **Truth** about the AACI **Cancer Paradigm** and what it means for you and your family.
- **Be amazed by doctors** and medical professionals who know this Truth – some want you to know it, and some don't... Learn why.
- Learn what you absolutely **must do and stop doing** if you have cancer right now, and what you **must do** for cancer prevention.
- Understand detoxification and the cancer diet in plain English.
- Learn about the **American Anti-Cancer Clinic**: situated within a 100-acre plus cancer-healing complex in the Pacific Northwest, to which cancer victims can come from all over the world where all their needs will be met—medical, educational and nutritional, at less than one tenth the cost of current cancer care today. We believe that **"if we build it, they will come!"**

This Book represents our "bread and butter" fundraiser, so we greatly appreciate your purchase and thank you for supporting the AACI. \$12 of each book is tax deductible as a donation to the AACI under IRS Code 501© (3).
